

Product Information

0630-8-8 Parker 30 Series Straight Hose Fitting

Parker's 30 Series Fittings are field attachable (reusable) style fittings which enables you to quickly and easily make hose assemblies right on the job site without special tools. The No-Skive 30 Series fitting assembly does not require removal of the outer cover or inner tube of hose, eliminating premature hose failure caused by skiving too much or too little. Parker's 30 Series fittings are used with Parker's 302 braided hose.

Product Data

Manufacturer Part Number	0630-8-8
Manufacturer	Parker Hose
Type	Swivel
Series	30 Series
Shape	Straight
Hose ID	1/2 in.
Port Size	1/2 in.
Tube Size	#8
Connection Type	Threaded x Nipple with Clamp or Shell
Fitting End Connection Size	#8
Applications	Industrial; General Purpose
Material	Steel
For Use With	302 Series Hoses
Thread Gender	Female
Thread Size	3/4 in.-16

Specification Sheet: PAR0630-8-8

Thread Standard	JIC 37°
Overall Length	3.20 in.; 81 mm
Exposed Length	1.86 in.; 47 mm
Hex Size	7/8; 1-1/16; 7/8 in.
