

Heat-Shrink Splices

HVS

In-line splices for 1/C shielded cable (5-35 kV)

Tyco Electronics' Raychem heat-shrinkable shielded power cable splices are pre-engineered to offer a compact, low-profile installation with a minimum diameter buildup.

All kits contain a solderless grounding kit, consisting of a ground clamp, a ground braid, and a shielding mesh.

The heat-shrink feature allows the kits to accommodate out-of-round, out-of-spec cable.

Rated to IEEE 404. For use on copper tape, wire shield, lead sheath, and UniShield cables. Some kits contain tube for outer layer.

72

Selection information: (dimensions in inches/millimeters)

Catalog number	Conductor size (AWG/kcmil)		Insulation diameter (min.-max.) A	Jacket O.D. (max.) B	Connector dimensions		Kit installed length L	Required installation space M
					Max. O.D. C	Max. length D		
HVS-820S	(5 kV)	(8 kV)

Ordering Information:

- Select the appropriate catalog number. Selections are based on the typical dimensions of 100% insulated cables (manufactured in accordance with the data contained in AEIC CS5-1987 and AEIC CS6-1987), commonly used connectors. Nominal insulation thickness (100%): 5 kV: 90 mils., 8 kV: 115 mils., 15 kV: 175 mils., 25 kV: 260 mils., 35 kV: 345 mils. Nominal insulation thickness (133%): 15 kV: 220 mils.
- For cables manufactured to other specifications, confirm selection with cable and connector dimensions.
- If using 5/8 kV (115-mil) cable, use 8 kV selection.
- HVS-SHIM kits are available if the diameter of one of your cables is not within the standard range (refer to page 95).
- Kits do not contain connectors; order compression or solder connectors separately.
- If external grounding and/or shield interrupting is required, order an HVS-EG kit from page 96.
- Standard package: 1 kit/box.
