

# ARMSTRONG® Striking/Struck

Armstrong® offers a wide variety of professional punches, chisels, hammers and accessories for just about any application. All are made to exacting standards with ASME and Federal Spec callouts where applicable. Punches and chisels are manufactured from either tool steel or high alloy steel for strength and durability. Traditional hammers are drop forged from alloy steel while dead blow hammers incorporate a steel shot filled canister. Available individually or in a selection of sets.

## CHISELS, PUNCHES & HAMMERS

Full shank heat treat is a two-step process, entire tool length is hardened and tempered, then the struck end is drawn back to resist "mushrooming" & "chipping"

Modified parabolic head directs the striking force to the center of the tool for extended tool life

# GEARWRENCH® Striking/Struck

GearWrench® striking and struck tools offer performance features that outperform other brands. Hammers and chisels are designed for long life and with safety in mind. Precision ground surfaces provide better visibility and ease of use.
