

ARMSTRONG® Striking/Struck

Armstrong® offers a wide variety of professional punches, chisels, hammers and accessories for just about any application. All are made to exacting standards with ASME and Federal Spec callouts where applicable. Punches and chisels are manufactured from either tool steel or high alloy steel for strength and durability. Traditional hammers are drop forged from alloy steel while dead blow hammers incorporate a steel shot filled canister. Available individually or in a selection of sets.

CHISELS, PUNCHES & HAMMERS

Full shank heat treat is a two-step process, entire tool length is hardened and tempered, then the struck end is drawn back to resist "mushrooming" & "chipping"

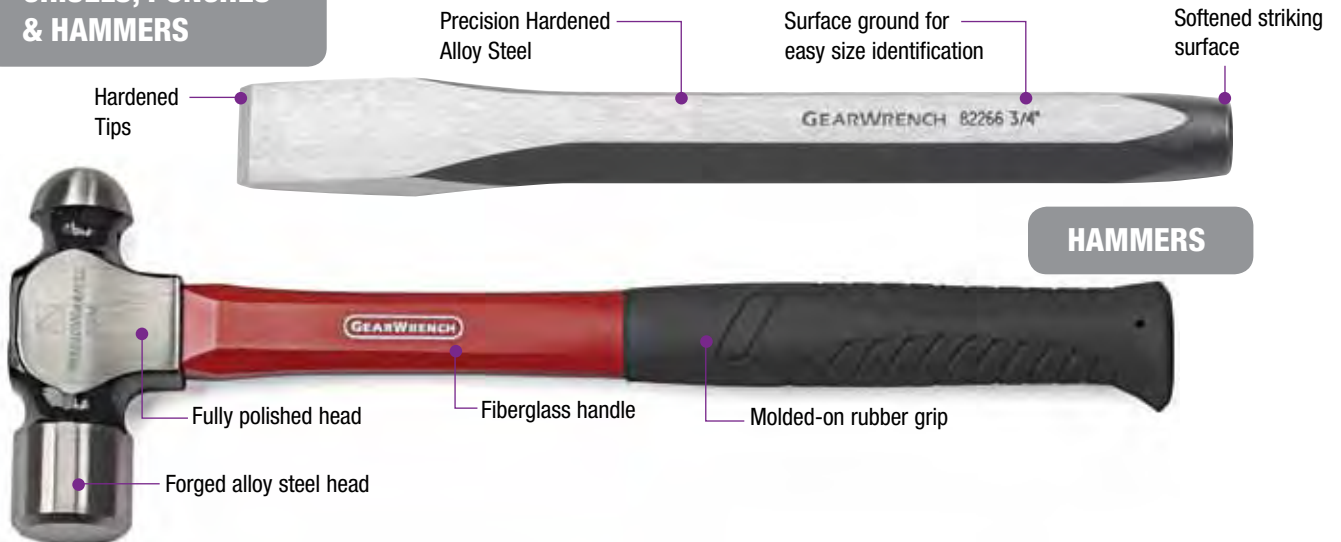

Modified parabolic head directs the striking force to the center of the tool for extended tool life

GEARWRENCH® Striking/Struck

GearWrench® striking and struck tools offer performance features that outperform other brands. Hammers and chisels are designed for long life and with safety in mind. Precision ground surfaces provide better visibility and ease of use.

CHISELS, PUNCHES & HAMMERS

ARMSTRONG® Standard Head One-Piece Dead Blow Hammers

- Made in the USA - Quality and Availability
- Steel Shot Filled Canister Creates A Dead Blow Effect; Sustains Impact, Maximizes Force , Reduces / Eliminates Rebound, and Absorbs the Shock of Impact
- Non-Sparking Hot Cast Urethane Covers Steel Shot Chamber and Steel Reinforced Handle; No Exposed Metal
- Hot Cast Urethane Face Will Not Mar Surfaces or Absorb Liquids. Resists Chipping and Splitting While Reducing Noise When Striking Metal Objects
- Steel Reinforced Handle Provides Added Strength and Safety By Resisting Breaking on Overstrike
- Textured Handle with a Flanged Butt End for a Sure Non-Slip Grip
- Safety Red Urethane for High Visibility
- Meets or Exceeds US Federal Spec. GGG-H-33A
