Sign And Label Printers

Indoor/Outdoor Grade Vinyl Tape (B-595 Material)

- Ideal for Facility and Safety identification such as 5S labels, pipe markers, safety & warning labels, equipment & panel labels, arc flash labels, chemical labeling and more
- Conforms well to irregular, curved, rough and highly textured surfaces such as painted cinder block walls; finished uneven wood; textured plastics; rough-pipes; paper-jacketed pipes; and powder-coated surfaces.
- Adhere to "difficult" low-surface energy items including PVC piping, blow-molded equipment cases, ABS plastics, and equipment made from recycled plastics
- Low-shrink vinyl minimizes the amount of unsightly dust and grime buildup that is often found around the edges of other vinyl labeling supplies and also reduces adhesive buildup in label printer mechanisms.
- 8-10 year average outdoor durability in temperatures from -40°F to 180°F (-40°C to 82°C)
- Labels can be applied in temperatures from 0°F to 180°F
- Patent Number D481.414
