## ABOUT LIFT

- Handles with **larger lift** provide greater leverage.
- Handles with smaller lift allow a nearly vertical cut.
- **Flat-bowled heads** are nearly flat for straight cuts.
- **Deep-bowled heads** are concave for "cupped" cuts.

The **1 IN LIFT** on AS 90310 allows for a nearly vertical cut. Maximum accessibility in tight spaces

The **2 1/2 IN LIFT** on AS 90320 allows for increased leverage.

The **4 IN LIFT** on AS 90340 allows for maximum pulling and prying leverage. Easier debris removal.

### Determine Maximum Cut Capacity

- What is the largest diameter you are considering cutting?
- Not every branch is suitable for cutting with a lopper
- Consider the hardness of the branch
  - Bypass loppers are best for cutting green, live branches
  - A High-Torque Bypass Lopper can cut hard or frozen branches
  - Anvil loppers are best for cutting dry or hard branches
- Consider your own physical condition, ability and experience
- Be safe: use a saw if a branch is too big or too hard to cut

### Determine Intensity and Frequency of Use

- Professionals can continuously make thousands of large cuts a week: all Corona® MAXFORGED loppers offer Limited Lifetime Warranties and most offer extensive replacement parts to get the job done, season after season
- Landscaping enthusiasts, casual gardeners and homeowners can make hundreds of moderate-sized cuts a month maintaining their yards and gardens: Corona® RED loppers feature design innovations that can make cutting easier and more comfortable

# MAX SHEARS & SNIPS

Since the early 1920s, when other manufacturers were settling for stamped or cast tools, CORONA® has been forging high-quality, classically designed agricultural shears and snips that deliver superior performance and reliability. Generations later, these same tools are shearing California grape vines, pruning lemon, orange and avocado trees in the Southwest, apples in the Northwest, Midwest and East, while clipping, plucking and shaping landscapes around the world.

The advertisement features a top-down view of garden wear items on a wooden surface. A large green kneeler with a grey strap is the central focus. To its right is a grey hip-trug with a green interior. In the bottom left, a pair of brown leather gloves with green floral patterns is visible. The background includes some green foliage. A grey banner at the top contains the brand name and history.

# WARRANTY INFORMATION

## the CORONA® Promise

The lifespan of a tool is dependent upon frequency of use, as well as, the conditions and environment in which it is used.

Tools used by professionals, everyday, on every job, will more likely wear out long before tools used by occasional or infrequent users. Typically, any defects in materials or workmanship will emerge early in the life of the tool.

**CORONA®** tools are designed, engineered and manufactured to perform their intended purpose, **Season after Season®**

Customer Satisfaction is at the top of our priority list, so in the event our tool fails to perform as intended due to materials and/or workmanship, **CORONA®** promises to provide a solution based on our three product lines and associated warranties.

**MAX FORGED**  
SHARPNESS & DURABILITY™

**MAX FORGED**  
STRENGTH & DURABILITY™

**MAX** | **MAX**  
SHARPNESS & DURABILITY™ | STRENGTH & DURABILITY™

**CORONA® MAX TOOLS** represent our best-in-class and have been specifically designed, engineered and manufactured for **PROFESSIONALS** and **PASSIONATE GARDENERS** that demand **maximum durability and lasting performance**.

**MAX** AND **MAX FORGED TOOLS** CARRY A **LIMITED LIFETIME WARRANTY**

**CORONA® MAX TOOLS** are guaranteed to be free of defects in materials and workmanship for the life of the tool.

If a **CORONA® MAX TOOL** is found to be defective, **CORONA®** will either replace or repair it free of charge once the tool has been returned along with the original customers' proof of purchase.

### WHAT'S NOT COVERED

**CORONA®** is dependable and trustworthy and we rely on our customers to be the same. We do not and cannot cover normal wear, lost or stripped parts, altered or modified products, or product damage due to negligence, misuse, or abuse. **OUR DEFINITION OF ABUSE-** Using a tool in a manner for which it was not designed.

**CORONA® RED TOOLS** are designed for **CASUAL GARDENERS** who want control and comfort, but not the maximum durability expectations designed and built into our **CORONA® MAX** line of tools.

**CORONA® RED TOOLS CARRY A LIMITED WARRANTY**

Corona® warrants RED tools to be free of defects in materials and workmanship. If your tool is found to be defective within ten (10) years from date of purchase, **CORONA®** will either replace or repair it free of charge once the tool has been returned along with the original customers' proof of purchase.

### MAKING WARRANTY CLAIMS OUTSIDE THE U.S.

The warranties outlined here apply specifically to products purchased in the United States. If you purchased your product outside of the U.S., your local **CORONA®** distributor's standard product warranty will apply. Outside the U.S., warranty claims can be made by returning the tool to where you bought it within the relevant timeframe, along with its packaging and original proof of purchase.

Corona reserves the right to ask Dealers and Distributors to send in product photo and contact information for a warranty claim. In some cases, a Return Merchandise Authorization (RMA) number may be required for product returns.

### Value Tools

Budget-friendly **Value Tools** are designed for performing basic tasks.

**CORONA® Value Tools** are covered by a standard manufacturer's

**One-Year Limited Warranty** against defects in materials or workmanship.

If your **Value Tool** is found to be defective within one (1) year from date of purchase,

**CORONA®** will either replace or repair it free of charge once the tool has

been returned along with the original customers' proof of purchase.

### PRODUCT SUBSTITUTION

**CORONA®** will make an effort to either repair or replace any defective tool with one that is similar. If, for any reason, this is not possible, **CORONA®** may choose to satisfy your claim by substituting a different product.

### GENUINE REPLACEMENT PARTS

All **CORONA®** tools are built to last, but certain components will wear out after heavy or repeated use. That's why we offer genuine replacement parts for most MAX products. Visit [coronatoolsusa.com](http://coronatoolsusa.com) to see available replacement parts by item number, or contact the **CORONA® Customer Experience Team** for more information at the number noted below.
