

Dynaswivel® Air Line Connectors

- Never Fight an Air Hose Again!
- The Dynaswivel® is a “universal-joint” that connects portable air tools to an air line.
- It improves tool maneuverability, minimizes operator fatigue and extends hose life.
- Patented; works great on air tools or paint guns.
- Choose from the most popular original Dynaswivel® style:
 - SWIVELS 360° AT TWO LOCATIONS which allows air hose to drop straight to the floor, no matter how the tool is held.
- OR, choose from the “single-pivot” style:
 - Right angle, “single-pivot” swivels 360° at one location. Permits 360° maneuverability of tool, while air hose extends horizontally.
