Product Data SKU 1820-HB-C

15"L X 7"W X 9"H

Weight 2 lbs. 11 oz.

## ***Product Details***

This oval shaped tool bag hangs on the aerial lift bucket with attachment hooks. There is a PVC ring in the top to shape the opening and Hard Body plastic on the sides to keep the bag open and rigid. Six hand tool pockets on the inside of the bag organize tools for easy access. Holes for attachment hooks are reinforced with brass grommets. The bag has a sturdy plastic bottom with drainage holes. A vinyl cover is attached to one side of the bag and has bungee cord in the hem to keep the cover on the bag while in transit. The cover keeps rain and dirt out and tools in.
