

BUCKET CONSTRUCTION

TOOL BUCKETS

TOTAL QUALITY FROM THE INSIDE OUT

BRASS SWIVEL SNAP

Rust and weather resistant. Swivel allows the bucket to be turned, and snap allows for quick release.

POLYPROPYLENE ROPE

Won't rot from exposure to UV.

ROPE SPLICE

The more wraps you put on the bucket, the tighter the joint sets.

LEATHER SIDE SUPPORTS

Added to rope holes to prevent abrasion to canvas.

MOLDED TOP RING

Stronger than metal PVC rod taped together. Made as a solid continuous injection molded, non-metallic material.

NYLON THREAD

Heavy nylon thread won't rot. Seams and hems won't separate.

UNIQUE CONSTRUCTION

Canvas is folded over outside stitches to protect thread from abrasion, which could cause the bottom to fail. Also eliminates any "flap" to catch on coil line hardware.

BUCKET BASE

Options include high impact polymer or leather. The strongest materials in the industry.

DRAIN HOLE

Allows water to escape through base.

TOOL BUCKET COVERS

RECYCLING AND AWARENESS

Our bucket covers can be used in a public awareness program complete with recycling and corporate logos.

2098-1-SCE

10" DIA X FLAT

Heavy vinyl with flip open top for easy access. Elastic stretch fit cord.

2098-V
