## **BAG CONSTRUCTION**

# **RUBBER GOODS STORAGE**

SINCE 1900 EST

## TOTAL QUALITY INSIDE AND OUT

#### SERGED EDGES

A special machine takes three strands of thread and sews them all at the same time around the edge of the fabric, preventing fraying (those loose strings that hang down on some bags) and extending bag life.

INSIDE

### NICKLE PLATED QUICK **RELEASE SNAP**

Nickle plating keeps these snaps rust and weather resistant, as well as convenient to easily attach and detach from workman's belt.

### THREE PIECE LEATHER **SNAP HOLDER**

Top grain leather reinforces our quick release snap outside and inside, reinforcing and strengthening by lowering stress on the canvas duck. All rivets are capped off and smooth, leaving no sharp edges to damage your rubber gear.

#### **TWO VENTILATION BRASS EYELETS**

Brass eyelets located on the bottom of the bags are rust and weather resistant, allowing for drainage at the base of the glove bags.

HARDBODY LINING Gloves and gaffs don't mix. Give your gloves that extra protection they warrant. Glove bags lined with Estex "Hard Body" material hold their shape and create a hard shell barrier between danger

and your rubber gear.

### **BELLOW'S GUSSET**

A gusset is a side piece sewn into a bag to give it thickness. A Bellow's gusset is tapered so the bag is wider at the top for easier access.

plated for rust and weather resistance.

#### **DOUBLE STITCHED SEAMS/** SERGED EDGES

The seams on all our glove bags are double stitched with nylon thread, and a 40 stitch bar-tac at all stress points for durability. With the addition of serging on all raw edges to prevent fraying, our bags are built to last.

#### PRINTED "ALWAYS WEAR **YOUR GLOVES**"

Our screen printing ink is colorfast and durable, with the clear safety reminder printed boldly on the side.
