

HAND OPERATED RATCHET CUTTERS

- Three models to choose from
- Soft Wire and ACSR
- Smaller than the typical chain style ratchet cutter
- Larger than the hand held style for inside electricians
- Light weight
- Offset cutting head
- Selection lever to open or close jaws
- Ratchet drive mechanism requires less force and leverage when cutting
- Handle plunger allows for fast advance or fast retraction
- Heat treated jaws on all three models
- ACSR Cutters include a keeper on the upper jaw to prevent blade separation while cutting
- Note: These cutters are not insulated live line tools. Do not use these cutters on energized conductor.

01-4001
