

GROUND / JUMPER ASSEMBLY TESTER

- This tester is designed to test in-service grounding and jumpering cable assemblies
- Regular periodic use will ensure that jumper assemblies perform as designed for personnel safety
- Tester is completely self contained, portable and sets up in seconds. Any standard 120 volt grounded outlet will provide power to the tester.
- A reference chart is provided for #2, 1/0, 2/0, and 4/0 Str. Cu. cables of specific lengths to determine correct test values
- A built in digital meter allows the operator to easily input the correct voltage specified on the reference chart for various sizes and lengths of cable
- A built in digital ammeter tells the operator if the assembly is in good working condition
- Test electrodes are available to fit a variety of grounding equipment including elbows, grounding bushings, and ball socket clamps
- Maximum voltage output is limited to protect the operator
- Pressure sensitive inspection labels are available to tag cables after testing
