## DESCRIPTION

The **I-320** from IOTA Engineering is a UL Listed fluorescent emergency ballast that allows the same fixture to be used for both normal and emergency operation. In the event of a power failure, the **I-320** switches to the emergency mode and operates **one** of the existing lamps for **90 minutes**. The unit contains a battery, charger, and inverter circuit in a single can, and can be mounted in the wireway or on top of the fixture. The **I-320** can be used with most **2'-4' T8** lamps and **2'-4' 14W to 54W T5** lamps with an initial output of up to **1350 lumens** for one lamp. **The I-320 utilizes AC output to ensure compatibility with new lamp technologies**, and features lamp selector leads for optimizing light output for the designated lamp type. The **I-320** is suitable for use in damp locations and in enclosed and gasketed fixtures. The **I-320** delivers high performance in a slim design, and is ideal for use in fixtures where ballast compartment space is limited.
