

Universal Absorbents and Gray All-Purpose Sorbent Pads

Gray universal absorbent pads and rolls absorb oil, water, glycols, gasoline, diesel, hydraulic fluids and most chemicals.

Gray Fine Fiber Universal Absorbents

Fine fiber meltblown polypropylene sorbents have a soft, super-absorbent fiber that resembles tissue paper. We thermally bond a thin layer to each side of our standard, coarse-fiber, meltblown polypropylene. These composites absorb quickly, remove the sheen, and grip cement floors.

Dimpled Absorbents

Dimpled meltblown polypropylene sorbents are single-layer, economical sorbents. This media passes through a thermal bonder, which ties down loose fibers. Dimpled sorbents are also perforated, which promotes waste minimization.

Spunbond Universal Absorbents

Spunbond meltblown polypropylene sorbents have an exceptionally strong, ultra-light nonwoven that resembles polyester. This fabric's high level of tensile strength and durability does not hinder its absorption capabilities. Thicker fluids penetrate the spunbond membrane and saturate the highly absorbent meltblown center layer.

Item #	Description	Roll/Pad Size	Absorption (Gallons)	Quantity per pkg.	Package Weight	Units/Pallet
GFMF150	Gray universal heavy weight absorbent rolls. Low lint.	30" x 150'	50.5	18	23 lbs.	18
GDML100	Gray universal medium weight absorbent pads. Dimpled and perforated.	15" x 18"	20.6	100	9.4 lbs.	36
GSMS100	Gray universal heavy weight absorbent pads. Spunbond, dimpled, perforated and durable.	15" x 18"	19.6	100	11.5 lbs.	30
