

Standard Polypropylene Oil Only Sorbents

Meltblown standard oil only sorbents are typically used to skim oil off of water. The open fiber construction draws hydrocarbon-based fluids into the center of the pads and/or rolls, while repelling water. This type of media is our most economical family of pads and rolls, yet it absorbs quicker and more than the other product families.

Item #	Description	Pad Size	Absorption (Gallons)	Quantity	Package weight
WM100	White oil only heavyweight pads.	15" X 18"	28	100	11.5 lbs.
