* DM DENOTES DIAMOND MOUNT; 5/8" HOLE BUSHINGS INCLUDED

MULTI-PURPOSE ENGINEERED REINFORCED CUT-OFF WHEELS (4" – 24")

Reinforced Cut-off Wheels

FEATURES	BENEFITS
• NorZon Thin Cut - premium abrasive and bond; R sides	• Maximum productivity
• Premium 90A abrasive and B97 bond system; R sides	• Lowest cost per cut
• 4NZ - zirconia alumina abrasive; R sides	• Extra fast cutting and very durable
• Proprietary B65B bond system	• Engineered specifically for foundry applications
• FabCut - high performance bond system	• Over 28% better cut rate than standard aluminum oxide
• Charger Long Life - a blend of premium zirconia alumina and aluminum oxide abrasives; R sides	• Out performs standard aluminum oxide up to 3X in life
• U57A - aluminum oxide abrasive; R sides	• Engineered for fast cut and long life on a variety of applications
• 23A, 57A - aluminum oxide abrasives; D sides	• Engineered for fast cut and long life on a variety of applications
• Gemini All Purpose - quality aluminum oxide abrasive; R sides	• Sets the industry standard for cutting all material in metal fabrication applications

CUT-OFF WHEELS

CHOP SAW REINFORCED WHEELS (10" – 16")

Offered in two performance tiers of Free Cut, Long Life and Rapid Cut as well as Gemini Aluminum.

Chop Saw Reinforced Wheels

FEATURES

- Free Cut and Long Life - side reinforced
- Rapid Cut - centrally reinforced, rough sides

Charger

- Zirconia alumina/aluminum oxide abrasive blend
- High performance resin bond

Gemini Aluminum

- Specially formulated bond for aluminum and other soft, non-ferrous metals
- No wax or rubber fillers

BENEFITS

- Resist breakage and provide straight cuts
- Free cutting, non-binding; burr- and burn-free cuts

- 2X the life and cut rate of aluminum oxide
- Free-cutting; burn-free cut

- Free cutting; resists loading
- No surface contamination
