

SHARPENING STONES

SPECIALTY LARGE ABRASIVE FILES

SICKLE & SCYTHSTONE

The silicon carbide Sickle & Scythesone quickly produces a fast-cutting edge on sickles, scythes and brush hooks. This stone is most frequently chosen where the speed of sharpening is the primary consideration.

TRADESMEN'S UTILITY STONES

These silicon carbide stones are designed to quickly sharpen trimming knives used on leather and rubber, also has usage as an abrasive file in many industries. The JT910 is a single grit stone without handle. The JT920 offers the same stone with a sturdy wooden handle. The JT930 also has a wooden handle, but features a stone with two different grit surfaces.

GARDEN TOOL SHARPENER

The silicon carbide Garden Tool Sharpener, used by gardeners and homeowners, has numerous industrial uses. The elliptical shape makes the stone conformable to all flat and curved cutting edges.

UTILITY FILE

Silicon carbide utility files have a long, wedge shape and four flat sides designed for sharpening coarse edges on cutting implements and edged garden tools. Fast and efficient, it outlasts and out-sharpens metal files. The wooden handle makes it easy to use.
