

PROFESSIONAL STRIKING,
DIGGING & FIRE TOOLS

PART 1

a quality brand of

WHEN ONLY THE BEST WILL DO...

... **GO TO NUPLA CORPORATION**, the leader in U.S. manufacture of specialty industrial-grade hand tools. The pioneer and innovator of TCP pultruded Nuplaglas[®], Nupla produces the strongest and safest fiberglass-handled striking, digging, cutting and fire tools available. In its 55,000 sq. ft. facility in Sun Valley, California, the company produces over 1600 hand tool products, including soft-face hammers, steel hammers, shovels, rakes, hoes, axes, non-conductive tools, and replacement handles.

As the industry leader in leader in TPC (Tension, Continuous, Parallel) fiberglass technology, Nupla's history is one of invention. Recognizing in the 1930's the opportunities presented by the development of plastics and related technologies, Nupla has been an innovator for over 70 years in the development of these technologies and has earned the reputation as the industry standard for fiberglass striking, cutting, digging & fire tools.

We've earned our stripes as the manufacturer of the **WORLD'S STRONGEST HAND TOOLS** and we put that stripe on every tool we produce.

GET THE STRIPE

NUPLA "INNOVATIONS" IN FIBERGLASS

- **Nuplaglas[®] Composite Halligan & Pry Bar Handles** - Designed to provide the performance of steel bars while maintaining the flexibility and light weight advantage of Nuplaglas[®] built to perform like steel. (Patent Pending)
- **Integral Rebar** - Short lengths of solid fiberglass incorporated at critical stress points in the handle pultrusion process assure superior reinforcement while providing optimum strength-to-weight ratio. This patented process is used in all Nupla digging tool handles.
- **Ergonomic Handle and Grip Design** - Hammers and shovels alike are designed with the operator in mind. Molded handles in Ergo Power[®] digging products reduce fatigue and offer greater control of the load. Three grip designs in Classic[®] & Ergo Power[®] striking tools let you match the tool to operator and the job.
- **Impax Power Drive[®]** - Nupla's unique **Smart Hammer Technology[®]** delivers the very best surface protective, non-marring, Dead Blow and Quick Change hammers in the industry.
- **Power Pylon[®]** - A rivetless shovel connection structure, made from an engineering composite, molded to the end of a Nuplaglas handle produces an integral fusion of handle to an innovative designed shovel blade.
- **Guyrod** - An alternative to steel strand cable used in utility and communications towers around the world. Continuous lengths of pultruded structural Nuplaglas[®] Guyrod are used in major infrastructure projects.

Call Nupla direct for a quotation.

■ THE BEST IN QUALITY

Every Nupla tool comes with the assurance that you have purchased **The Best Tool in the industry**. Only the highest quality materials go into our tools. Nuplaglas® handles are manufactured in the USA to precise specifications and carry a Lifetime Warranty. Industrial grade steel and components designed by Nupla engineers undergo the highest level of scrutiny before they are matched to a Nuplaglas® handle.

■ THE BEST IN DESIGN

Each and every Nupla Tool has been engineered, tested and retested for balance, strength and durability. Available in the length and grip style you will need for every job, Nupla tools are designed to meet your needs on every job.

■ THE BEST IN PERFORMANCE

Manufacturing • Building • Construction • Roads and Highways • Automotive • Railroads Mining • Fire Utilities • Landscape • Safety • Hazmat • Aerospace • Wood working • Metal Working
Telecommunications • Firearms • Custom designs and colors • OEM parts

Nupla can deliver the tools to maximize performance in every application. From a precise tap to the heaviest demolition project, we have the tool you need.

- Nuplaglas® Composite Pry Bars.
- Impax® Dead Blow hammers are non-marring and absorb recoil.
- Quick Change Hammers & Tips hammers give you up to eight tip density choices.
- Non-Sparking hammers for volatile environments.
- Steel Sledge hammers from 2 lbs to 20 lbs with 10" to 36" handles meet or exceed all federal standards.
- Safety Soft Steel Sledge hammers for striking extra hard metals.
- Cutting – Axes, mauls, bolt cutters and cable cutters.
- Auto Body Hammers & Dollies.
- Shovels – From general construction to heavy industrial, Nupla Classic, Ergo and Power Pylon handles and heavy duty blades will out perform all other shovels.
- Specialty Digging – picks, mattocks, digging bars, telegraph shovels, tampers, soil probes, trenching and cable tools.
- Certified Insulated Non-Conductive digging tools for maximum safety on the job site.
- Fire Tools – Axes, Pike Poles, Halligans and Wildland tools.

NUPLA® ... "THE BEST COMPONENTS" INDUSTRIAL NUPLAGLAS® STRIKING TOOL HANDLES & GRIPS & HEADS

■ CLASSIC® HANDLES

Nuplaglas® Handles have been the standard of the industry for nearly 60 years. Thousands of strands of fiberglass encased in a proprietary resin deliver a Super Duty handle tough enough to carry the Nupla Lifetime Warranty.

■ ERGO-POWER® HANDLES

Same Super Duty Nuplaglas® with a mold injected protective covering. Protects and extends the life of the handles, grips become integral portion of the handle.

■ GRIPS

Super Grip (SG)

- Safest grip in the industry. Use in all weather conditions, with or without gloves.
- Classic rubber or integrated Ergo style

Cush-N-Grip (H)

- Long sleek grip
- Available in rubber

Circular Stripe (C)

- Comfortable standard grip & design
- Available in rubber or integrated molded design
- C & CS short sizes

Single Bit Grip (SB)

- Provides directional accuracy for single bit axes & mauls

Circular Stripe (CS), (CSL)

- Comfortable standard grip & design
- Available in rubber or integrated molded design
- CSL long sizes

Double Bit Grip (DB)

- For double bladed chopping tools

■ HEADS

Nupla molded striking heads are available in various hardnesses of non-marring plastic composites. Metal heads available in forged steel & brass and are heat treated for specific levels of hardness.

SOFT FACED HAMMERS NUPLA SMART HAMMER® TECHNOLOGY

**WHEN THE JOB REQUIRES MORE THAN JUST A HAMMER,
NUPLA HAS THE TOOL YOU NEED**

**DEAD BLOW POWER DRIVES® - QUICK-CHANGE HAMMERS & TIPS
IMPAX® - STRIKE PRO® - CBH - NON-SPARKING - HANDI-HAMMER®**

Power Drive Dead Blow hammers have shot-loaded composite interior cavities, fully encased in a tough polymer outer jacket. Free flowing inner shot concentrates striking power and increases driving force resulting in zero rebound and full energy transfer to the object being struck. Non-marring faces are abrasion resistant and withstand severe striking applications. *Extreme Power Drive* hammers have cut resistant 100% cast urethane face and optional metal face. All Power Drives have solid *Nuplaglas*® handles and ergonomic non-slip grips.

Quick-Change Hammer/ HOLDERS are engineered to out perform rubber or plastic face hammers. These *Dead Blow* or *Slug Loaded* hammers deliver the force of a steel hammer while protecting the job surface from damage. From 6 ounces to 13 pounds, you choose the right hammer, then select the exact durometric hardness for every job from **8 Replaceable Tips. (Super Soft to Extra Hard)**
Tips sold separately.

All *Power Drive* and *Quick-Change* hammers are available in a *Non-Sparking* version. Non-ferrous brass replaces steel shot and fittings for an added level of safety when working around volatile or flammable materials.

STRIKING TOOLS - SOFT FACED

POWER DRIVE® DEAD BLOW HAMMERS NON-MARRING - SMART HAMMER® TECHNOLOGY

STRIKING TOOLS - SOFT FACED

STANDARD POWER DRIVE® DEAD BLOWS

Shot-loaded composite interior cavities are fully encased in a tough polymer outer jacket. When struck, the free flowing inner shot concentrates striking power and increases driving force. Non-marring face protects surface being struck. Available with a steel face for extra hard surfaces.

EXTREME POWER DRIVE®

Dead Blows have a cast urethane face to protect the hammer from damage when striking unfinished or sharp metal surfaces. No other hammer offers this combination of surface protective force and durability. Also available with one steel face.

Strike Pro hammers have all the dead blow features of the Power Drive® in a lighter, more economical configuration. Available in two colors for dedicated job identification, these hammers are durable and non-marring.

NON-SPARKING POWER DRIVE® & QUICK-CHANGE (QC) DEAD BLOW HAMMERS

NON-MARRING - SMART HAMMER® TECHNOLOGY

NON-SPARKING STANDARD & EXTREME POWER DRIVE® DEAD BLOWS

Shot-loaded composite interior cavities are fully encased in a tough polymer outer jacket. When struck, the free flowing non-ferrous inner shot concentrates striking power and increases driving force. Non-marring face protects surface being struck. Available with a brass face for hard surfaces.

Impax Power Drive®

Power Drives®

Extreme Power Drives®

Strike Pro®

NON-SPARKING QUICK-CHANGE IMPAX® DEAD BLOW HAMMER/HOLDERS

Non-ferrous shot loaded composite cavity, fully encased in a tough polymer outer jacket. Replaceable tips available in eight durometric hardnesses from Super Soft to Extra Hard. Tips sold separately.

STEEL HAMMERS

STRIKING TOOLS - STEEL

NUPLA STEEL HAMMERS

Nuplaglas® handles and carbon steel forged heads combined under tightly controlled specifications deliver the highest quality industrial hammers available in the market today. Nupla "Smart Hammer Technology" is used in every step of the design and manufacture of these tools.

High carbon steel content, precision forging and heat treating, assure a durable and safe striking head.

Resin rich fiberglass pultrusion used in the manufacture of Nuplaglas® delivers a handle stronger than wood, chemical resistant and unaffected by moisture. Weather and insect resistant Nupla handles will out perform wood and other fiberglass hammers.

All Nuplaglas® handles carry a Lifetime Warranty

SLEDGES - HAND DRILLING - CROSS PEINS - SLUGGING - BALL PEINS - CLAWS - FRAMERS & MORE...

CLASSIC NUPLAGLAS®

Handles with CS and SG slip resistant grips.

ERGO POWER®

Design handles. Injection molded cover protects fiberglass from over strikes. Molded CS or SG grips.

INDUSTRIAL SPECIALTY HAMMERS

DRIVE HAMMER

Multi-function soft face hammer with a 3/8" drive

Fits all SAE & metric sockets (not included)

Performs like a breaker bar w/non-marring hammer face
Tighten bolts and tap parts into place with one tool.
More torque than a nut driver or short breaker bar.
Replaceable tips available from soft to extra hard.

Brass Hammer

Rubber Mallet

Engineers Straight Pein Hammer

Engineers Cross Pein

SOFT STEEL SAFETY SLEDGE HAMMERS

SLEDGE HAMMERS

FOR STRIKING EXTREMELY HARD METAL SURFACES: HARDENED PINS, RAILROAD SPIKES & CUTTING TOOLS

- Ideal for Mining Equipment and Rail Applications
- Similar hardness to brass
- Can replace brass when non-sparking is not required
- Maximum - 30 Rockwell C Hardness
- Reduces shearing when striking hardened steel
- Blue Heads marked "S" for "soft"
- Ergo Power® Super Grip black handles
