

Die Grinders

APPLICATIONS

These tools are very popular, all-purpose die grinders for applications such as deburring, die contouring, flash and removal, blending and smoothing. They are primarily used with carbide burrs and mounted points. Industries using the grinders include: metal fabrication shops, die shops, foundries, steel mills, shipyards, and construction.

G-3507 SERIES

- Rugged 1/3 HP motor
- 35,000 RPM
- Compact, lightweight, easy to handle
- Steel Motor housing-withstands rugged use
- Shown is optional lock-off lever throttle which prevents accidental tool start up
- Interchangeable with CP-9107

G-3507

G-1340 & G-1340A SERIES

- Rugged 1 HP motor
- 18,000 or 25,000 RPM
- Steel motor housing to withstand heavy use
- Double angle collet for extreme accuracy
- Motor parts interchangeable with other 1340/1350 tools
- Available in lightweight aluminum for overhead work or where a lighter tool is needed
- Interchangeable with CP-9113

G-1340

G-1350 & G-1350A SERIES

- Rugged 1 HP motor
- 18,000 or 25,000 RPM
- Steel motor housing to withstand heavy use
- Safety lever
- Motor parts interchangeable with other 1340/1350 tools
- Available in lightweight aluminum for overhead work or where a lighter tool is needed
- Interchangeable with CP-9113G

G-1350
