**Built To Be Bold**  
Quality Never Looked So Good

**BUILT**<sup>TM</sup>  
**TO BE BOLD**  
**Quality Never Looked So Good**

Sure, our sockets look great. But underneath their sleek, electro-phosphate finish lies a product with a heart of impact-grade steel. Sockets that are built to be tough. Built to be bold. Built to be Ingersoll Rand.

Bien sûr, nos douilles sont très belles. Mais, sous leur élégante finition électro-phosphatique, elles cachent un cœur d'acier à l'épreuve des chocs. Des douilles construites avec la robustesse en tête. Construites pour se distinguer. Construites pour être à l'image d'Ingersoll Rand.

Ja, sicher – unsere Steckschlüsseinsätze sehen gut aus. Aber unter dem eleganten Elektrophosphat-Finish befindet sich ein Produkt mit einem Herz aus schlagsicherem Stahl. Steckschlüsseinsätze, die vom Konzept her robust und leistungsstark sind. Steckschlüsseinsätze von Ingersoll Rand.

Sin lugar a dudas, nuestras bocas para llaves tienen un aspecto inmejorable. Pero debajo del reluciente acabado de electrofosfato hay un producto con un corazón de acero a prueba de impactos. Bocas fabricadas para ser resistentes. Fabricadas para destacarse. Fabricadas para ser Ingersoll Rand.

Certo, le nostre chiavi a bussola hanno un bellissimo aspetto. Ma sotto l'élégante finitura per elettrofosfatazione c'è un prodotto con un cuore di acciaio antiurto. Sono costruite per durare. Sono costruite per essere robuste. Sono costruite per essere Ingersoll Rand.

Because of the elasticity of the material, the diameter at the female square drive of the socket (D2) can be slightly larger than the ring. Note: The retainer rings must have a tight fit on the socket.

Du fait de l'élasticité du matériau, le diamètre du côté carré entraîneur de la douille (D2) peut être un peu plus large que l'anneau. Nota: L'anneau de retenue doit être serré sur la douille.

Aufgrund der Elastizität des Materials kann der Durchmesser am Antriebsvierkant des Steckschlüssels (D2) nach oben hin etwas abweichen. Es ist auf festen Sitz des Ret-Ring's auf dem Steckschlüssel-Einsatz zu achten.

Debido a la elasticidad del material, el diámetro en el cuadradillo hembra de la boca (D2) puede ser ligeramente más grande que el anillo. N.B. El anillo retenedor debe quedar ajustado a la boca.

A causa dell'elasticità del materiale, il diametro sulla parte dell'attacco femmina della bussola, potrebbe essere leggermente più grande. N.B. L'anello di ritenuta deve essere aderente alla bussola.
