- Open Scissor Jaw for Easy Cable Insertion
- Rotational Head
- Bright White, LED Lights for Working in Low Light Conditions
- Rapid Advance
- Overload Bypass Protection
- Sidebar Handle for Stability and Balance
- 5 Year Warranty on Tool, Battery & Charger

The **SL-95YC** is designed to cut copper and aluminum cables as well as lead-sheathed telecommunication cables. The extremely large jaws and scissor-type blades allow for easy cutting of large underground cables. The sidebar handle allows the user to stabilize and balance the tool. This tool also has a built-in bypass cartridge to avoid cutter damage for those cables that are beyond the cutter's capacity. The open jaw design allows the user to scoop up cables that are against a wall, in hard to reach areas and/or the ground.

NOTE: DO NOT CUT STEEL.
