As a result of severe storms (summer or winter), it's wise to plan for emergencies resulting in a major power loss as a result of extremes in hot or cold weather, hurricanes, typhoons, thunder storms, blizzards, and ice storms. Under severe weather conditions like these, portable systems offer an advantage when it becomes necessary to move about a facility to power down or disconnect critical equipment, retrieve sensitive documents, or guide employees through remote areas that lack adequate backup lighting.

The solution is Streamlight's line of rechargeable, portable lanterns and flashlights that are equipped with "smart" power failure circuitry. When the power goes out, these rugged, dependable workhorse lighting tools switch on, helping to light the way to safety in pitch dark conditions. Ideal for evacuation team leaders and for placement in planned evacuation routes/areas, stairways and hallways.
