

LUMALUX® and LUMALUX® ECOLOGIC®

High Pressure Sodium Lamps

LUMALUX and LUMALUX ECO high pressure sodium lamps offer a reliable light source with high efficacy and long life. With up to 140 lumens per watt (LPW) initial efficacy and excellent lumen maintenance, these lamps deliver consistent light levels throughout their long lifetime. LUMALUX ECOLOGIC lamps have identical physical and electrical construction to standard LUMALUX lamps, but with reduced mercury content enabling them to pass the Federal TCLP test¹. The combined product offering builds a complete portfolio of the industry's most popular high pressure sodium lamp wattages and configurations.

LUMALUX high pressure sodium lamps have a proven history in the marketplace for over 30 years, yet refinements to the technology provide an opportunity to improve performance ratings. As such, many LUMALUX and all LUMALUX ECO lamps are now rated up to 30,000+ hours average life, which is up to a 25 percent improvement over industry standard products. These lamps also feature lead-free glass, bases and manufacturing process, reducing overall environmental impact.

Application Information

Applications

- Architectural
- Canopy
- Floodlighting
- High bay
- Industrial
- Low bay
- Roadway fixture – Cobra head
- Wall mount

Key Features & Benefits

LUMALUX:

- Offers up to 30,000+ hours of average rated life
- Very high efficacy: Up to 140LPW
- Lamps available from 35 to 150 watts in medium base and 50 to 1000 watts in mogul base
- Most types available as clear or coated
- Universal operating position
- Lead-free outer jacket
- Lead-free bases allow a maximum base temperature of 250°C, 40°C higher than ANSI specification for soldered bases

LUMALUX ECO:

- All ECO products have an average rated life of 30,000+ hours*
- Pass Federal TCLP test¹
- May reduce disposal costs
- Direct replacement for standard HPS lamps that do not pass the Federal TCLP test
- Meets all physical and electrical ANSI requirements

*Except LU1000/ECO

1. TCLP test results are based on NEMA LL Series standards and are available on request.

ECOLOGIC® is a comprehensive program focused on addressing environmental issues at all stages of lamp life.

1. Average rated life based on 10 hours per start and it is defined as the hours at which 50% of a group of lamps are still operating, except where denoted with a "+" next to the life rating, which refers to 65% survival.

2. Mean lumens are measured on ANSI reference circuits at rated wattage and 50% of average rated life.

General Notes:

- TCLP claims based on SYLVANIA's TCLP test protocol. Some states and localities have lower limits than the Federal TCLP standard and have different disposal regulations for mercury containing lamps. Data available upon request. 1998 Federal TCLP limits: 5.0mg/l for lead and 0.2mg/l for mercury.
- CRI for LUMALUX and LUMALUX ECO lamps is approximately 22. CCT for LUMALUX and LUMALUX ECO lamps is approximately 2100K.
- For lamp wattages of 360W or greater, it is recommended that lampholders with nickel-plated copper alloy center contacts (with spring) should be used rather than electrical contacts made of stainless steel.

Ordering Guide

LU	70	/	—	/	—	/	ECO
LUMALUX	Wattage: 35, 50, 70, 100		Base:		Finish:		ECOLOGIC
High Pressure	150, 200, 250, 310, 400		___ (mogul)		___ (clear)		___ (not TCLP passing)
Sodium	600, 750, 1000 watts		MED (medium)		D (coated)		ECO (TCLP passing)

Sample Specification

Lamps shall be LUMALUX ECO high pressure sodium lamps that pass the Federal TCLP limits. Lamps shall include a welded, lead-free brass base, a lead-free glass outer jacket, and shall be a direct retrofit for standard HPS.
