

Shrink-Kon®

Portable Heat-Shrink Torch

Separate fuel and air flow controls enable precise adjustment of flame and temperature up to 1350°C.

The Shrink-Kon® Portable Heat-Shrink Torch offers a safe, simple, and effective solution to virtually any application requiring a controlled flame. The unit offers a maximum output of 1350°C – hot enough even for thick-wall heat-shrink tubing – yet operates on standard, widely available butane, yielding up to 220 minutes per fueling.

Individual controls for fuel and air flow enable easy adjustment of temperature and precise flame control. It's perfect for use on thin-wall heat-shrink sleeving, as well as heat-shrink terminals and labels. It's also ideal for brazing and soldering. To start the unit, simply twist the start button to the on position and push. The piezo ignition automatically lights the torch.

For safety, a kill-switch button turns the flame off instantly, and a safety lock prevents accidental ignition. The ergonomic rubber grip and rugged, lightweight (only 280g filled) construction prevent operator fatigue or discomfort. The Shrink-Kon® portable Heat-Shrink Torch includes a sturdy, removable base for hands free operation.

Specifications

- Dimensions (without base): 9.9cm L x 3.6cm W x 13.7cm H
- Weight (when filled): 280g
- Fuel Tank Capacity: 0.06L
- Operating Time (per full fuel tank): Up to 220 minutes

Safe:

- Safety lock prevents accidental ignition
- Kill-switch button allows instant shut-off

Simple:

- Runs on widely available standard butane fuel
- Automatic piezo ignition offers quick, easy lighting
- Ergonomic rubber grip and light weight to ensure user comfort
- Sturdy, removable base for hands-free use

Effective:

- 1350°C output capacity satisfies virtually any heat shrink, brazing, or soldering requirement
- Dual fuel and air-flow controls enable separate adjustment of temperature and flame precision
- Brass and steel construction provides durability

Cat. Number	Description
WT-PTORCH	Shrink-Kon® Portable Heat Shrink Torch*

* Please note that for safety reasons, the WT-PTORCH ships without fuel. The unit operates on standard butane, purchased separately.
