Warp's POLY-COVER®

The Original

Full Weight Poly Sheeting for over 50 Years!

TOUGH PLASTIC FOR TOUGH JOBS IN CONSTRUCTION AND AGRICULTURE

Full honest weight: Warp's only standard.

Meets Building Code Specs.

Most building code specs require full 4 and 6 mil thick sheeting in building construction,

not 3 or 4.5 mil†! Don't chance having to break up concrete or tear out wallboard because of cheap under-weight or mis-labelled sheeting that doesn't meet specifications! **Sun-Resistant Black outperforms clear in outdoor applications.**

All Warp's POLY-COVER plastic is guaranteed to be full weight and thickness as marked on each roll, and to comply with ASTM D-4397. Specifications for Polyethylene Sheeting, NBS PS17-69, and National Bureau of Standards Handbooks 130 and 133.
