CIRCULAR FLARED END BRUSHES feature crimped wire fill that has been "pre-flared" to match the working angle of the brush at operating speed; suited for addressing broad and slightly contoured surfaces.

POLYFLEX® ENCAPSULATED CIRCULAR FLARED END BRUSHES

Black Elastomer* - Crimped wire fill that has been encapsulated in a heavy-duty elastomer that gradually wears away to keep only the wire tips exposed. Their saucer-shape, narrow face, and aggressive brushing action make them suitable for addressing edges, corners, and confined areas.

O.D.	Wire	Cup	Overall	Max.	Standard	Item Number	
Diameter	Size	Size	Length	RPM	Pack	Steel	Stainless
1-3/4"	.006	3/4"	2"	25,000	2	35222	_
	.0104					35223	35226
	.020					35224	_
2"	.0104	3/4"	1-1/8"	20,000	2	35233	_
	.020					35234	_

^{*} See Elastomer Color Code Chart on page 51 for more information.

PENCIL END BRUSHES contain straight wire fill material retained in a small diameter steel tube. They provide a light-duty brushing action suitable for very small recessed areas.

n.	_

Tube	Wire	Trim	Overall	Max.	Standard	Item Number	
Diameter	Size	Length	Length	RPM	Pack	Steel	Stainless
1/4"	.0104	3/4"	3-3/4"	8,000	10	99825	99823

When brushing a recessed area or the inside diameter of a tube, use an End Brush in the following manner: Insert the brush, start the brush rotating. Turn off the power before removing the brush. This will prevent the brush from flaring out and enable it to fit into the recessed area again.

1. Insert Brush

2. Apply Power

3. Shut-Off Power

4. Remove Brush

MOUNT END BRUSHES SAFELY

When mounting end brushes, the amount of overhang from the tool should be minimized by clamping on as much of the straight portion of the stem as possible. However, the collet or chuck should NOT clamp on the radius at the base of the stem to insure a secure hold before use. See photo above for the correct brush orientation.
