## ABRASIVE/GRIT/DENSITY KEY

ABRASIVE	S/C				A/O
	SHARPER, FINER/BRIGHTER SCRATCH PATTERN		MORE DURABLE, LONGER LASTING, POLISHED FINISH		
GRIT SIZE	XC (24-36)	C (50-80)	M (100-150)	F (180-220)	VF (240-360)
	FASTER, AGGRESSIVE CUT, ROUGHER FINISH			REDUCED CUT RATE, FINER FINISH	
DENSITY	2				9
	SOFT, OPEN, CONFORMABLE, LESS BURNING/LOADING			HARDER, MORE DURABLE, FASTER CUTTING, BETTER FINISH	

## FEATURED PRODUCTS AND AVAILABILITY

### Surface Stripping and Finishing Discs

These smear-resistant discs provide a unique combination of aggressive performance, long life and improved finish. They are ideal for removing coatings on a variety of substrates, such as wood, metal and plastics and outperform traditional coated abrasive products, leaving a thoroughly cleaned surface, which ensures excellent adhesion in subsequent processes such as coating, painting and soldering.

Surface Finishing depressed center wheels, with controlled porosity offer a cooler cut rate.

Refer to the coated abrasive quick-change disc section for a list of quick-change back-up pads.
